Results from two recent higher education surveys* demonstrate the high value that students and faculty place on technology in the classroom.

The tools that you will learn about in this session encompass learning content creation, discovery, and delivery; faculty and learner interaction; and student assessment. They can be used to create rich digital learning spaces, enable the full fidelity and vivid presence of video meetings, and create engaging multimedia learning content that students can play, pause, and replay to fit their individual learning needs.

Whether you are teaching on campus, online, or in hybrid formats come to this session ready to explore technologies that you can use to engage your students in learning anytime, anywhere via a full range of devices.
